Scope

ASTRONAUTICA ACTA is devoted to the international exchange of technical knowledge in astronautics. It is the editorial objective of the ACTA to place before the world community of research scientists and development engineers significant technological advances in astronautics that might not come to their attention so readily in their own countries. The ACTA covers current work in propulsion, astrodynamics, gas dynamics, guidance, space flight, and physics of the atmosphere and space, as well as other aspects of astronautics, and also offers authoritative reviews designed to widen awareness of research and development trends in these fields in countries throughout the world.

Submission of Manuscripts. (Consult the inside back cover of the journal for style requirements and mailing instructions.)

Reprints

Authors of original papers and review articles will receive 50 reprints of their papers free of charge and may order additional reprints at a nominal price.
